Dear Sir:

Your very interesting letter of May 20, 1931, was received yesterday. With the greatest pleasure I enclose two printed lists, one of Cacti; and one Succulents. You will notice that they are extremely short ones, but among them are two new species: -

Cactus Broadwayi Britton and Rose; and

Senecio Freemanii Britton & Greenman.

The first, so far as known at present, is only found on the islands of Tobago and Grenada, B. W. I.; and the Senecio is confined to this island -

Yours very truly

W. E. Broadway
